FIXER

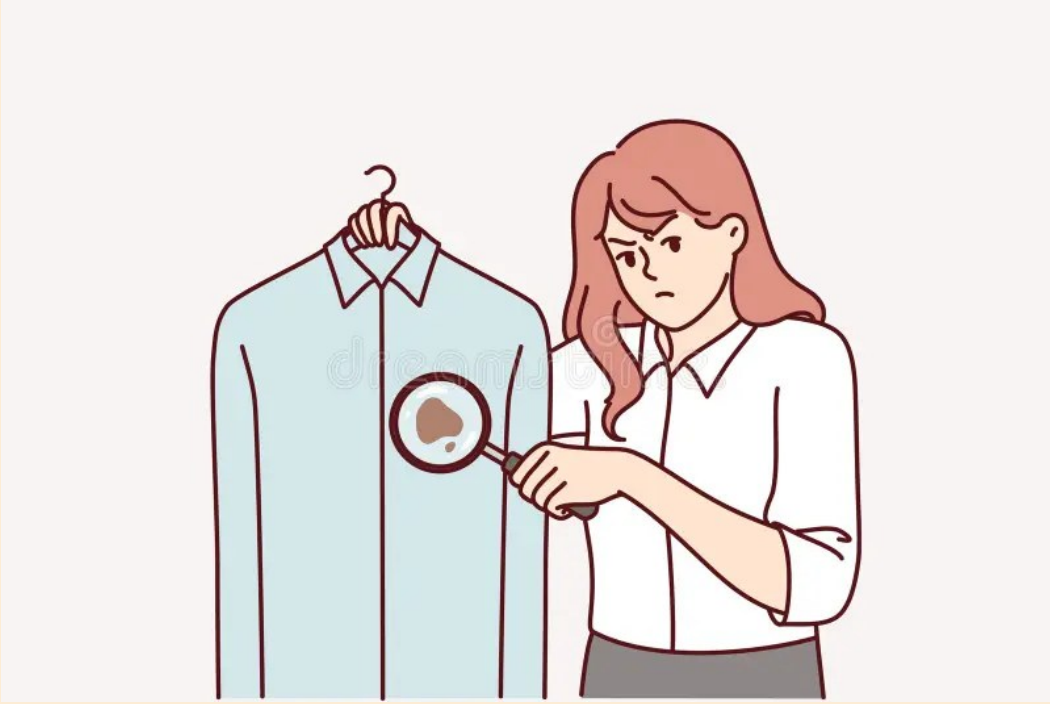

to make your life easier

Household problems and Daily inconveniences

- Following a recipe and something goes wrong ?

- Got a stain on your favourite shirt ?

Household problems and Daily Inconveniences

The aforementioned problems can make you really unlucky sometimes:

1. Got a stain when you have a job interview.
2. Burned the recipe when you have guest over.
3. Have a tear in your clothes when you're out with friends.
4. Want to coverup tiny holes and cracks in walls on a budget.

…to mention a few

A Quick hack would really come in handy

Many times the problems come have a time limit after which there’s little to be done. But it also means that action in that time frame can save the day.

Solve it with Fixer

- you might know how to get rid of the stain and what to do with a burned recipe. But what's the guarantee that you will always have the means to.
- You need things that you simply don't have at the moment . But that doesn't mean the problem can't be fixed. You just need a new way. A BETTERS way.

For Fixer to work :

- It will need to be trained on and analyze large amount of data relating to the particular problems and specific conditions they occur in.
- Methods to solve them as well as alternates for that method in case original method does not work.
- It could use regression and classification in it’s working.

Data Required

Fixer would need IMAGES, TEXT and NUMERICAL(do determine the quantity required) data in it’s training.

How would Fixer be different

- Any AI could solve those problems but the solution mightnot be the best one.
- Fixer would provide a solution catered to YOU

  for eg:

1. how long has it been ,
2. what type of fabric,
3. and what all do you have available to fix it in the moment
